The Bousteador

The Bousteador

The Bousteador

MILLIMETRE DESIGN SDN BHD was involved in two notable projects: Sentral Suites and The Bousteador. For Sentral Suites, the client sought a design that would add commercial value and foster interactions among different generations and local residents. Residents expressed concerns that the building might not represent their heritage or harmonise with the community. Millimetre Design responded by creating a design inspired by traditional games, integrating them into the complex's fabric.

This approach aimed to honour Malaysia's heritage and create a vibrant tribute to the nation's cultural diversity. For example, the Sepak Takraw lobby features patterns mirroring the rattan woven ball used in the game, with lighting and materials capturing its essence. The Congkak Lobby reflects the game's rhythmic motion, with carved wooden walls and warm lighting evoking traditional Congkak boards.

The Bousteador, a 23-storey building located in Mutiara Damansara, Petaling Jaya, draws

inspiration from Boustead's long-standing reputation and adaptability. The design aimed to meet various needs while showcasing the company's strength, business acumen, and culture.

A three-pronged approach – 'A Game Changer', 'A Post Pandemic Office', and 'Inspired Spaces' – was adopted, focusing on creativity, integrity, and innovation. Outstanding bold designs, glass doors, and one-of-a-kind interchangeable layouts allowed spaces to be reconfigured easily for co-working, seminars, training, events, or private meeting areas.

The ground floor features an open office with private areas sectioned by glass panels, softened by smooth curved walls. The 3rd, 4th and 10th floors have similar layouts with textured countertops and lounge areas. The design aimed to create a transformational space, which resulted in a 62.4% reduction in office space. Equipped with technology and moveable screens, it highlights the company's commitment to flexibility and innovation.
