**T**HE STRENGTH AND SOUL of Millimetre Design Sdn Bhd lies in its passionate team, who are the foundation of their successes. Since the company's inception in 2011, Millimetre Design Sdn Bhd has been striving to provide exceptional interior design services with a focus on refined quality and delivering the perfect balance of form and function. Based in Kuala Lumpur, this consultancy and build firm is no stranger to the industry. Their expertise in interior design, project management, and contract solutions, coupled with sterling standards and innovative ideas, have amassed a substantial and impressive clientele in a large array of projects, including those in residential, commercial, corporate, and hospitality.

Under the guidance of Alan Fong (Design Principal & Director) and Vienna Chew (Design Director), Millimetre Design Sdn Bhd has become a powerhouse, providing designs

that infuse innovation, culture, form and function, which exceed the expectations of projects awarded to them. Two such projects include the Gamuda Gardens Sales Gallery and Twentyfive.7 Sales Gallery, where Millimetre Design Sdn Bhd has managed to combine more than just design with functionality, where each interior space is unique in its own right.

Gamuda Gardens is an 810-acre development offering a variety of homes, all with the aspiration of quality living within the grasp of Mother Nature. The Gamuda Gardens Sales Gallery aims to invite potential residents and owners to embark on a journey of experiencing life in the residential development. Hence, the artistic and design direction of this sizeable and highly-themed facility is to capture the serenity associated with nature, whilst highlighting the prominence of environmentalism in today's world. To bring this to life, Millimetre Design Sdn Bhd merged the ambiance of the outdoors

Twentyfive.7 Sales Gallery

with lush frondescence into its structure. The result embodies flowing lines in the reception area that mimic the surface movement of water, accompanied by walls with wooden textural elements and tropical greenery that breathe the entire area to life. Included in the design is a forest-themed 'experium' dark room, an exhibition space containing three-dimensional maps and models, a sunset lounge and discussion area, a premium lounge, a forest-themed kids play area, a luxurious multi-purpose hall, as well as well-appointed back offices.

The Twentyfive.7 mixed-use development represents the epitome of luxury that is well-centred around community living, where its vibrancy is strategically aimed towards a younger audience, and where the lines between work and leisure are intentionally blurred. As such, the concept for the Twentyfive.7 Sales Gallery is inspired by the

prism form, representing the three points – residence, community, and the developer – coming together to showcase community living worth having. These triangular concepts, interpreted by deconstructivism, string art, and non-rectilinear shapes, have resulted in a design that is assured, geometric, and polished. These qualities in the design allowed the space to translate notions of youth, vigour, and hospitality the moment prospects step into the space.

These two projects – amongst many others – have allowed Millimetre Design Sdn Bhd to separate themselves from the norm by developing a unique methodology of utilising design to curate meaningful experiences. As such, it comes as no surprise that Millimetre Design Sdn Bhd managed to snag four awards as well as one nomination at the International Property Awards for Interior Design for 2021-2022.
